Evan Tran

Mississauga, ON | 647-762-0984 | evanthanh.tran@mail.utoronto.ca | github.com/etpans

Education

University of Toronto, Mississauga — Mississauga, ON
Bachelor of Science in Computer Science — *Sep 2024 – Expected Jun 2029*

- Enrolled in the University of Toronto Mississauga Co-op Internship Program
- Coursework: Systems Programming, Object-Oriented Programming, Data Structures & Algorithms, Discrete Mathematics

Projects

Trove | *Next.js, React, TypeScript, Material UI, NestJS, TypeORM, AWS S3, Expo* — May 2026 – Present

- Developed a full-stack student and note management platform with Next.js and NestJS REST APIs, supporting 5 record and attachment workflows
- Modeled TypeORM entities for users, classes, students, notes, and files, enabling class-based records and sortable notes across 5 data types
- Implemented JWT routes, AWS S3 attachments, reusable forms, and Expo mobile access, covering web and mobile workflows

MyShell | *C, Linux* — Jan 2026 – Apr 2026

- Engineered a Unix-style shell in C on Linux, supporting command execution, job control, and background process management
- Implemented pipes, I/O redirection, and signal handling, enabling multi-process command workflows
- Validated memory safety and runtime behavior with Valgrind and iterative tests, catching defects before submission

Club Dashboard App | *Flask, React, MySQL* — Feb 2025

- Created a full-stack club dashboard app with Flask, React, and MySQL, centralizing event information into 1 view
- Developed Flask and MySQL backend routes integrated with React, connecting backend data to user-facing views
- Shipped a working hackathon prototype through rapid testing and feature integration during the Feb 2025 event

Volunteer Experience

Toronto Vietnamese Alliance Church — Toronto, ON
Lead Audio Visual Technician — *Jan 2022 – Present*

- Led a team of audio-visual technicians across services, weddings, and special events, supporting live production for 100+ attendees
- Cut setup time by 50% by redesigning technical workflows and streamlining coordination between off-stage operators and on-stage personnel

Fandom Wiki Community — Online
Technical Administrator — *Jan 2020 – May 2024*

- Designed a wiki landing page and Lua templates, improving navigation and increasing daily page views by 4,000+
- Authored MediaWiki templates and technical documentation, standardizing contributor workflows and reducing onboarding friction

Port Credit Programming Club — Mississauga, ON
Member & Peer Mentor — *Sep 2021 – Jan 2024*

- Solved mock Canadian Computing Competition problems, strengthening algorithms, data structures, and debugging fundamentals
- Reviewed algorithms and code with peers, improving implementation quality during pair-programming sessions
- Mentored beginner members through programming concepts and debugging sessions, supporting peer learning

Skills

Languages: Python, Java, C, TypeScript, JavaScript, SQL, HTML/CSS
Frameworks: React, Next.js, NestJS, Flask, Node.js, Material UI, Expo, JUnit
Data & APIs: REST APIs, TypeORM, PostgreSQL, MySQL, AWS S3, OpenRouter API integration
Developer Tools: Git, GitHub, Docker, Linux, Bash, npm, Valgrind
